GERMAN EMMA CHOSE LISBON TO INSTALL ITS NEW HUB

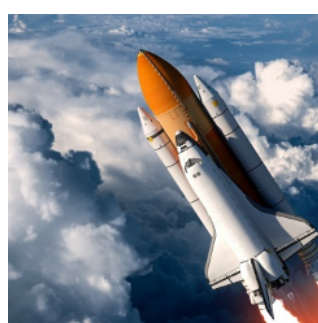

November 2020

The German Emma – The Sleep Company, one of Europe's fastest growing startups, announced the opening of an office in Lisbon that will function as the company's new Business Service Centre for the European and Latin American markets. It is expected to employ 100 new jobs in the coming months.

According to Filipa Guimarães, responsible for Emma's Southern Europe and Latin American markets, "Lisbon is an attractive city even for foreigners, due to the quality of life and the dynamic startup scene it has. Besides, there is a lot of talent in Portugal, it is easy to recruit people who speak more than one language and we have high quality universities".

INDUSTRY HIGHLIGHT: CORK

Portugal is the **largest cork producer in the world**, representing **49% of the world's cork supply**. **34% of the world's area of cork oak forest** is located in Portugal and the country is also responsible for **63% of the sector's exports**.

Cork isn't simply the wine's best friend. Cork is used by NASA on spacecraft, in Hollywood, by architects and engineers. It also improves acoustics and is great for thermal insulation. It is impermeable to liquids and gases, anti-allergic and is used in fashion, yoga mats, furniture and inside baseballs. Even Cola-Cola used it in the XIX century. The applications are endless. And it is green!

M&A

Recent Track Record in M&A operations

October 2020

The country remains attractive and open to Mergers & Acquisitions by foreign companies.

Recent deals reflect the current dynamism, such as the Italian **SIT Group**, which has acquired Portuguese Janz and enters the water meters market ([press release here](#)) as well as the German wholesaler giant **Metro AG** that acquired Aviludo Group, the second largest Food Service Distribution player in Portugal, strengthening its presence in the country ([press release here](#)).

INNOVATION

Portugal won first prize at ECOTROPHELIA Europe 2020

October 2020

Two master's degree students from the University of Aveiro won the first prize with an eco-innovative food preparation product at Ecotrophelia Europe, considered as the biggest European competition in food eco-innovation.

The food preparation "Orangebee", based on aquafaba and bee pollen, which reuses waste from the food industry, was the winner of the competition which brought together university students from 13 European countries.

The competition aims to promote innovation, entrepreneurship and competitiveness in the European agri-food sector, challenging students in post-secondary education to develop innovative and sustainable products.

WHAT COMPANIES SAY

"Our mission is to improve the way people and companies work. Forever. As our business continues to build globally, we were looking to expand our capabilities and are excited to be putting down roots in Porto. At the heart of our business, we help companies bring ideas to market. Engineering excellence is critical to that and we believe the addition of a location in Porto alongside the people and culture of Portugal will support that goal."
